We do. I guess the term raw data was the wrong word. We (Weston) are suppose to run all documents through review (Ceci/Denise) prior to submitting them to EPA. Just letting you know that these table are just being pulled directly from SCRIBE which does have the validated data.

Sorry for the confusion.

Jeff:

It is my understanding that you guys have already received the final data. Do we have tables for the final data?

I'm having Mark reproduce the data tables that will be put up on the epaossc site. I noticed that some fields were

9522456

left blank if the corresponding data was non-detect. Also, data is only highlighted if it first exceeded the 3x background rule. Thought that really applied more to Brenda and Michelle, so I'm having him omit the 3x background and just compare to EPA RSLs and LA RECAP (both Industrial). Just wanted to confirm that these tables will not have been formally reviewed and should be considered raw data tables.

Thanks,

Jeff Wright, CHMM

Jeff:

I have put up a epaosc site and have you added as someone that can modify the site. Please post pics, data tables, flexviewer link (under links) and anything else that appears to be appropriate.

The contact person for ERT is Greg Powell and I will be contacting him shortly.

Thanks
